DV90 Dual View Trucks

Redefined safety: Everything in sight

The DV90 Dual View sets new standards in terms of operator and construction site safety, flexibility and economic efficiency. The dual view concept allows a comfortable and quick change of the seat position through a 180° turn of the entire operating and seat console. In this way, the operator always has perfect vision in the direction of travel - during transportation, loading and unloading. The rotation can be performed conveniently from the driver's seat by simply unlocking the seat console and turning it around.

- High driving position, high working position
- Optimal view for more safety
- Hydrostatic drive
- More ease of use thanks to the ergonomic rotary console
- Comfort cabin
